

# PEGASUS NOVA LOGGING SYSTEM

Pegasus Nova is a compact portable logging system designed exclusively for use with GOWell’s Pegasus™ portfolio. The system eliminates the need for the bulky Warrior Panel™ while retaining the functionality and flexibility of Warrior 8 software. The high-speed modem panel handles all downhole communications with the telemetry and is fully automatic as it self-adapts to any wireline cable on power-up. The system incorporates an API-RP67 compliant cable interface with key-lock safety switch. The CDP panel handles depth and tension and is compatible with a wide range of depth systems includes Benchmark compatibility. The system includes a depth and line simulator for easy diagnostic and system testing independent of a wireline cable.

The system mounted in a portable case includes three 1U panels:

- Proven CSS high speed telemetry modem
- Ultra reliable DC power supply
- CDP – a Cable / Depth / Tension panel which includes depth and line simulators eliminating the need for external

## FEATURES

- Pegasus Tools SRO operations
- Supports a wide range of depth/tension measuring systems including BenchMark systems™
- Compatible with Warrior 8 software™ (requires USB dongle)

PEGASUS NOVA
